

Claims Property Is Part Of Bed Of Rio Grande

J. A. McMahon Says Z. T. White Sold Him Gov-
ernment Property.

Alleging that real estate sold him in the bed of the Rio Grande and therefore an international boundary line, J. A. McMahon is attempting to avoid payment of certain taxes on a piece of land in the Rio Grande. McMahon claims that he purchased the property with the understanding that it was a valuable building site but when he attempted to fill in the lots with dirt in order to make the site a desirable locality, he was stopped from doing so by the United States government on the grounds that the tract in the bed of the Rio Grande and on the international boundary between the United States and Mexico, was not subject to disposal by the United States government.

FRANK LOFTUS WILL MAKE REPORT TO AMERICAN LEGION. Frank Loftus, president of the El Paso post of the American Legion, has called a meeting for tonight at 8 o'clock in the club room in the basement of the chamber of commerce for the purpose of reporting to business and insurance the report of Capt. Frank Loftus, who represented the El Paso post at the state convention.

COLONEL GOES TO CAMP CODY. Col. G. W. Biegler, 13th cavalry, passed through El Paso Friday on his way to Camp Cody, New Mexico, to act as a board that will hear claims presented by men of that post.

Electric Power Will Be Used In Disposal Plant

Council Instructs the Street Railway Company to Install Substation.

The city council Friday morning decided upon electricity as the main power for the new sewage disposal plant. A motion was made and carried to instruct the El Paso Electric Railway company to proceed at once with the installation of a new substation and lines and whatever is necessary to take care of the new sewage disposal plant.

It was decided that electricity as the main power meant a probable cheaper price in the course of years and less trouble. The auxiliary plant was referred with other details to the council as a whole. The total cost of the plant approximately \$15,000 among the following items: two 11 inch pumps, \$4,000; outlet to the river, \$11,000; two 100 hp. motors, \$1,500; engine, \$1,500; building to house plant, \$2,000.

Plans were opened for all the values needed in the disposal plant, including the city water system, etc., and the matter was made a special order for Saturday morning meeting. Eight full bids and two partial bids were received. They ran from a little over \$11,000 to about \$13,000 in the total. It was practically settled that the disposal plant was the winner in price unless it was, perhaps, the large 20 inch ones of which there are none in the city now. The city now has 30 per cent. Ludlow valves and Art Woods, superintendent of the city water works, and E. M. Murphy, plumbing inspector, made the point that it was decidedly advantageous to standardize the valve system.

Health Officer To Work Among Mexican People

Texas Association Plans Campaign for Improved Conditions.

Austin, Texas, Oct. 17.—The Mexican population of Texas in relation to good health is a great problem in the Lone Star state, declared Dr. E. B. Reed, executive secretary of the Texas Public Health association, today.

The Mexican people must be cared for in this state as well as the rest of the population, said Dr. Reed. "Texas, with its large area, has a large percentage of Mexicans, and one may see that if an epidemic should break out among them it might easily spread all over the state. Besides, there is a great amount of tuberculosis among them and this must be prevented and cured."

It is a fact that in the past we have not given enough attention to this problem. We must immediately do so in order to prevent the spread of the white plague in Texas, which last year exacted the toll of 100,000 lives in the state.

Boilermakers Favor Union Representation In Local Chamber

The local boilermakers' union at its regular meeting Thursday night voted to instruct its delegates to the Central Labor Union to favor the latter body having a representative in the El Paso chamber of commerce.

This question is now up before all the unions which have representatives in the central labor body where the matter of sending such representatives will probably be decided a week from next Monday night.

Employer Group Has Objections To Labor Plan

Is Willing to Grant Right to Unionize Only With- in the Plant.

(Continued from page 1.)
The employers' group, however, has an organization created by their own men in their own shops and having no authority outside their shops. In the public group two classes of opinion prevail. There are those who would grant the right of wage earners to elect their own spokesmen and daily secretaries from their ranks, but the labor group would not allow the right to be granted to anyone but the labor group itself. The right to be granted to anyone but the labor group itself. The right to be granted to anyone but the labor group itself.

Comprehensive Plan Suggested. A comprehensive plan whereby the right of workers to associate in any organization, whatever, is secured, is being suggested so as to avoid a direct recognition of any particular method as the only one to be used in the organization of the workers.

There is a feeling among some employers that it would be more economical in the long run to recognize labor unions or any other trade organizations, provided the individual workers could be held responsible for contracts made and agreements signed by their representatives.

Employees of this type believe that it would be more economical in the long run to recognize labor unions or any other trade organizations, provided the individual workers could be held responsible for contracts made and agreements signed by their representatives.

SENDING U. S. TROOPS TO SILEZIA IS SCORED

(Continued from page 1.)
to Silesia. He added that under the treaty Germany was required to pay the expense of policing that country during the election.

Senator Wadsworth said that it had been intimated to him at the war department that authority to send the troops was found in the rejection by the senate of the amendment to the treaty by senator Fall, Republican of New Mexico, proposing that the United States should not participate in the Silesian elections.

"Except in a Treaty." Senator Wadsworth declared that the criticism of the Silesian expedition was a "slandering" of the United States.

Replying to senator Wadsworth, Senator Mitchell declared the criticism of the Silesian expedition was a "slandering" of the United States.

ONLY THREE AMENDMENTS ARE BEFORE THE SENATE

Washington, D. C., Oct. 17.—With the Shantung amendment to the peace treaty, presented by senator Lodge and approved by the foreign relations committee, finally rejected in the senate, with a majority of 75 against it, yesterday, there remained but three of the committee's amendments for the senate to act on.

Of those remaining one relates to American representation on the reparations commission and two to the league of nations assembly.

In the vote of 75 to 25, 14 Republicans swung over to the Democrats while three Democrats lined up with those supporting the Shantung amendment. Of the six senators absent, two Republicans were not recorded as in favor of the amendment and one Republican and three Democrats an opposing it.

ON INSPECTION TRIP. Capt. John A. Wagner, district quartermaster, left Friday for Columbus, Miss., to inspect the conditions there of camps and transportation.

SIXTEEN YEARS SEARCH ENDED

Young says Tanlac did the work when everything else had failed.

"When I found Tanlac, my search of sixteen years for a medicine or treatment that would overcome my trouble was ended," said James Young, of 451 Cramer street, Milwaukee, Wis., the other day.

"I spent a small fortune for medicine and treatments during that time," continued Mr. Young, "and for the good it did me I might as well have thrown the money in the street. I had a bad case of stomach trouble, and everything I ate would sour and I would be so badly swollen from gas afterwards that I would be perfectly miserable. Sometimes this gas would rise up into my chest and cause my heart to palpitate something awful and I would have the worst sort of headaches. I was badly constipated all the time, and I honestly believe I had the worst spells of headache a human ever had. I would frequently roll and toss all night long and not sleep a wink, and when morning came I was so tired and weak I could hardly get out of bed and dress myself. I also suffered from biliousness, and finally got so weak and run down that I lost lots of time from my work and in fact, I had to spend a good portion of my time in bed."

"When I heard about Tanlac, I thought I would give it a trial. Well, sir, I have only been taking this medicine a short time, but let's me honest truth, I have improved so much that I can get out and do as much work in a day now as I could in a week before I began taking it. Why, it is simply wonderful the way Tanlac has overcome all my trouble after everything else I tried had failed to even give me temporary relief. I have gained a good deal of weight, and can just feel my strength coming back to me right along. I have a fine appetite and can eat just anything I want without suffering afterwards. In fact, my stomach seems to be in first class condition now. I am no longer constipated, and never have a headache any more. I don't have to roll and toss at night now, but when I hit the bed I just stretch out and go to sleep and am dead to the world until time to get up in the morning. I have never seen or heard of anything to equal Tanlac, and I'll tell the world that it did the work for me after everything else I tried had failed."

Four Indians Enlist; Assigned To Engineers

Not to be outdone by the four young men of Lubbock, N. M., who last Wednesday walked into the local army recruiting office and enlisted in order to be together, four Indians from the government agency at Shiprock, N. M., did the same thing Friday.

MEXICO PLANS TO DEVELOP ITS NATURAL RESOURCES

According to the Escobedo, a newspaper of Mexico City, the Mexican government is evolving comprehensive plans for the development of the great natural resources of that country, among others that of iron. To this end one or more iron and steel plants is being considered. The Escobedo says that Luis C. Sepulveda, chief of the department of mines in the department of the secretary of industry, commerce and labor to the president's cabinet, has been commissioned to make an exploration of the vast coast to place the best location for an iron and steel plant. The paper also says that Mexico sees a vision of exporting iron and steel products to the United States.

PARTY LEAVES TO SECURE BODIES OF 3 AVIATORS

San Diego, Calif., Oct. 17.—After a delay of two days, caused by waiting for authorization from the navy department for use of a warship, an army party left here Thursday for Annapolis, Md., on the Gulf of California, to identify and bring back the bodies of Lieutenants C. L. Connelly and W. H. Waterhouse, American army aviators who were lost while on border patrol duty two months ago.

HANDS LOOT THIEF'S MILL

Press reports reaching Juarez are to the effect that 25 handbags entered the city at Juarez, 10 miles south of Mexico City, Friday night and robbed the clerks claiming the loss of 40 percent of the loot. The handbags first gained the watchman. As the handbags rode away, the reports state, they fired their revolvers into the air and thus aroused the federal garrison. The handbags, however, entered a strip of woods and escaped.

DELAYED CATTLE SHIPMENTS FROM MIDLAND DISTRICT

Red Barton, livestock inspector in the Midland district of Texas, in a delayed report to the Panhandle and Northwestern Live Stockmen's association, for the week ending October 11, gives the shipments of live stock at 44 cars. The shipments followed by W. T. Blacking, two cars of stock horses and mules from Midland to Fort Worth; B. Dawson and company, 24 cars of stock cattle from Midland to Amarillo, Texas; and three cars of cows and calves to Ft. Worth; Barber Bros., two cars of cows from El Paso to Fort Worth, W.
